

Software built around territory, evidence and operations.

A compact visual atlas of geospatial
products, applied tools and spatial
systems.

SELECTED BUILDS

GeoPlatform · Pulso · Anti IA

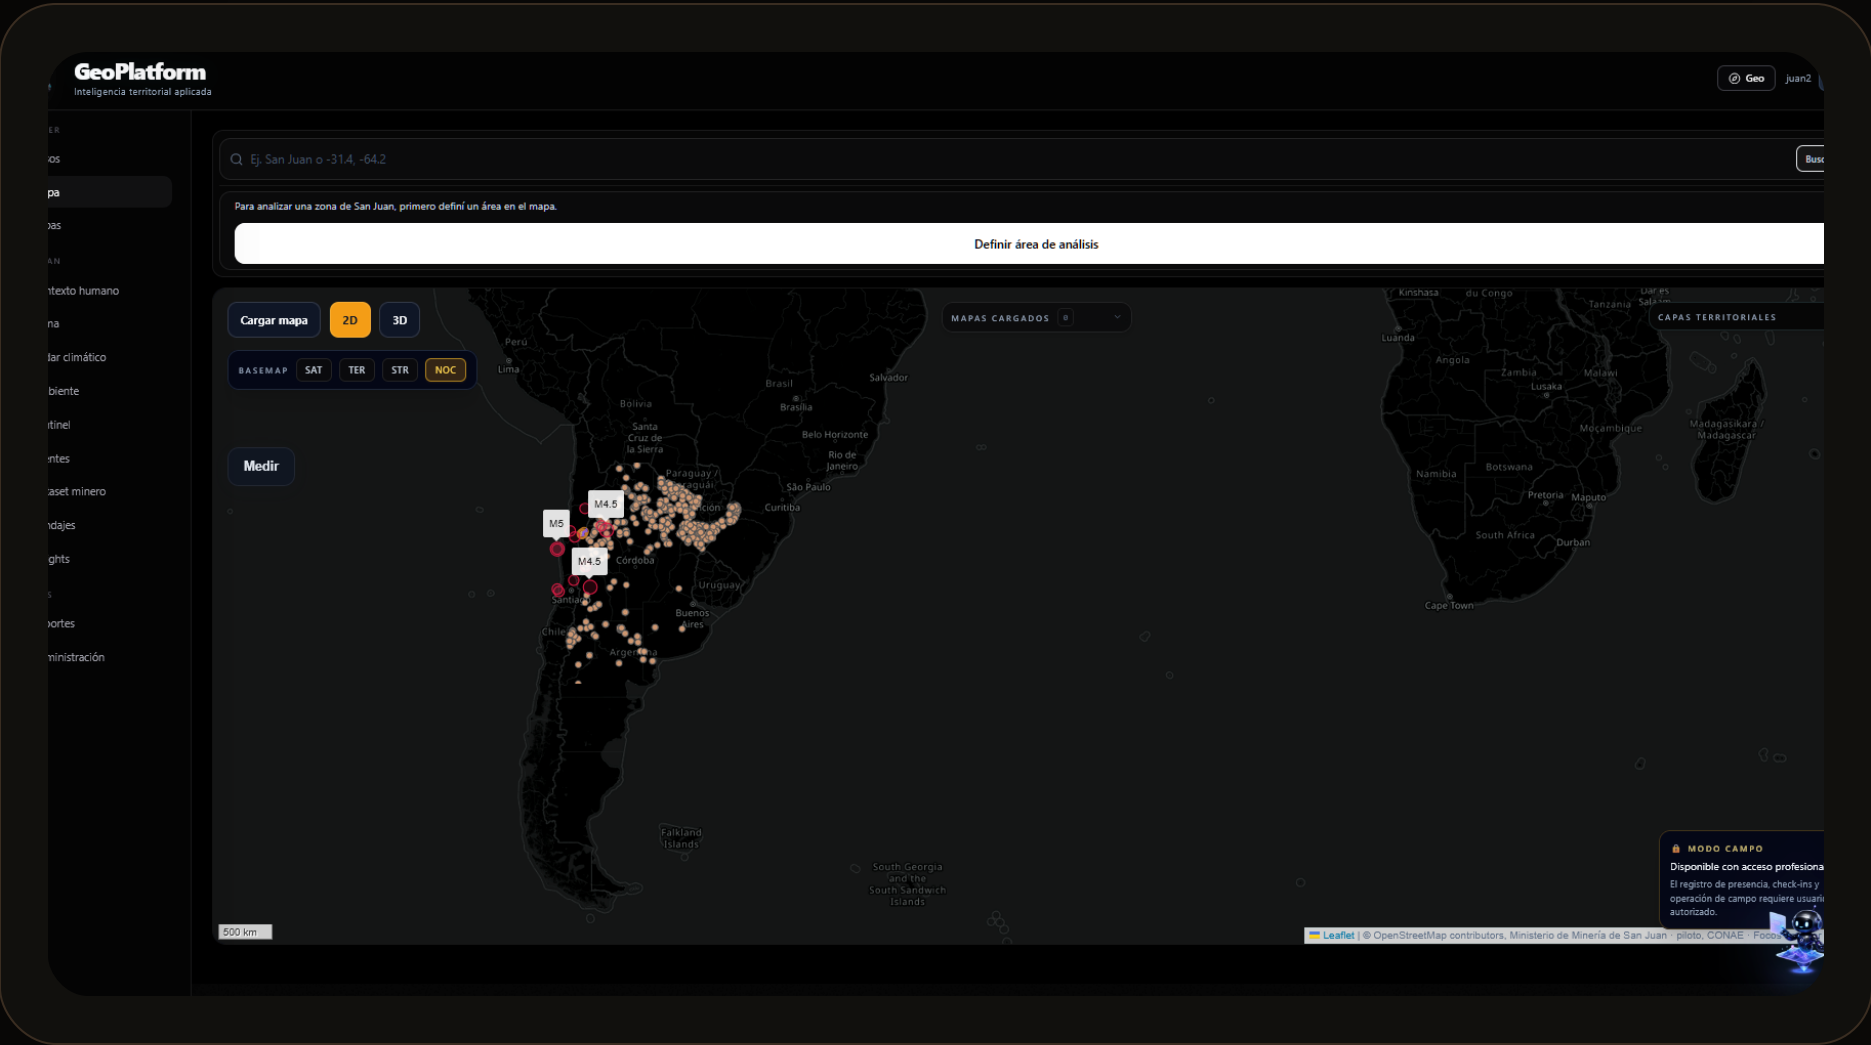

FleetFlow Sim · Atlas Geotech

GEOSPATIAL · TERRITORY · EVIDENCE · OPERATIONS

A compact visual atlas of my public-facing software builds.

SELECTED BUILD

GeoPlatform

STATUS

LIVE APPLICATION

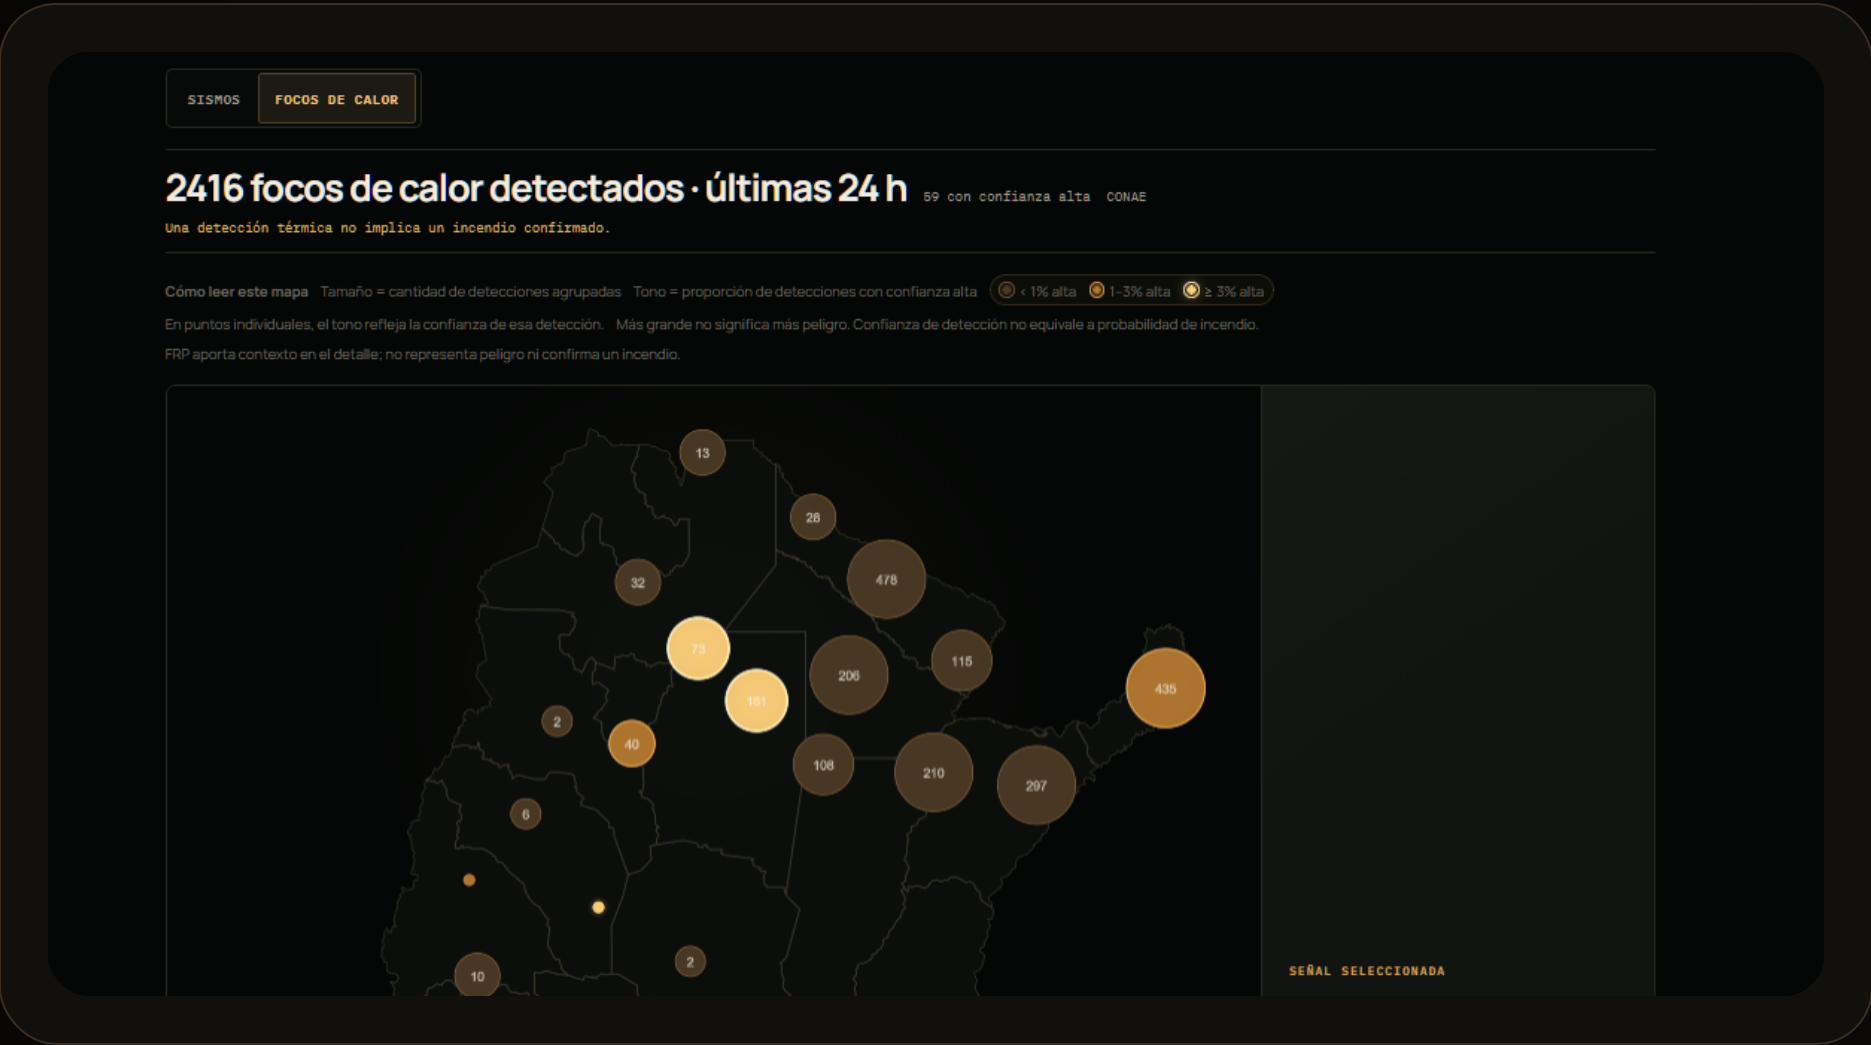

A 2D/3D workspace for checking what is happening around a place: mining data, satellite imagery, weather, earthquakes, routes and field context.

STACK

- React
- TypeScript
- FastAPI
- PostGIS
- Leaflet
- Cesium

open app →

Pulso Público Argentina

STATUS
LIVE · OPEN SOURCE

A public map of recent signals across Argentina: earthquakes, thermal detections, weather and national indicators, with the source and update time visible.

STACK

- React
- TypeScript
- MapLibre
- Public Data

open app →

repository →

Anti IA

STATUS

EXPERIMENTAL PRODUCT

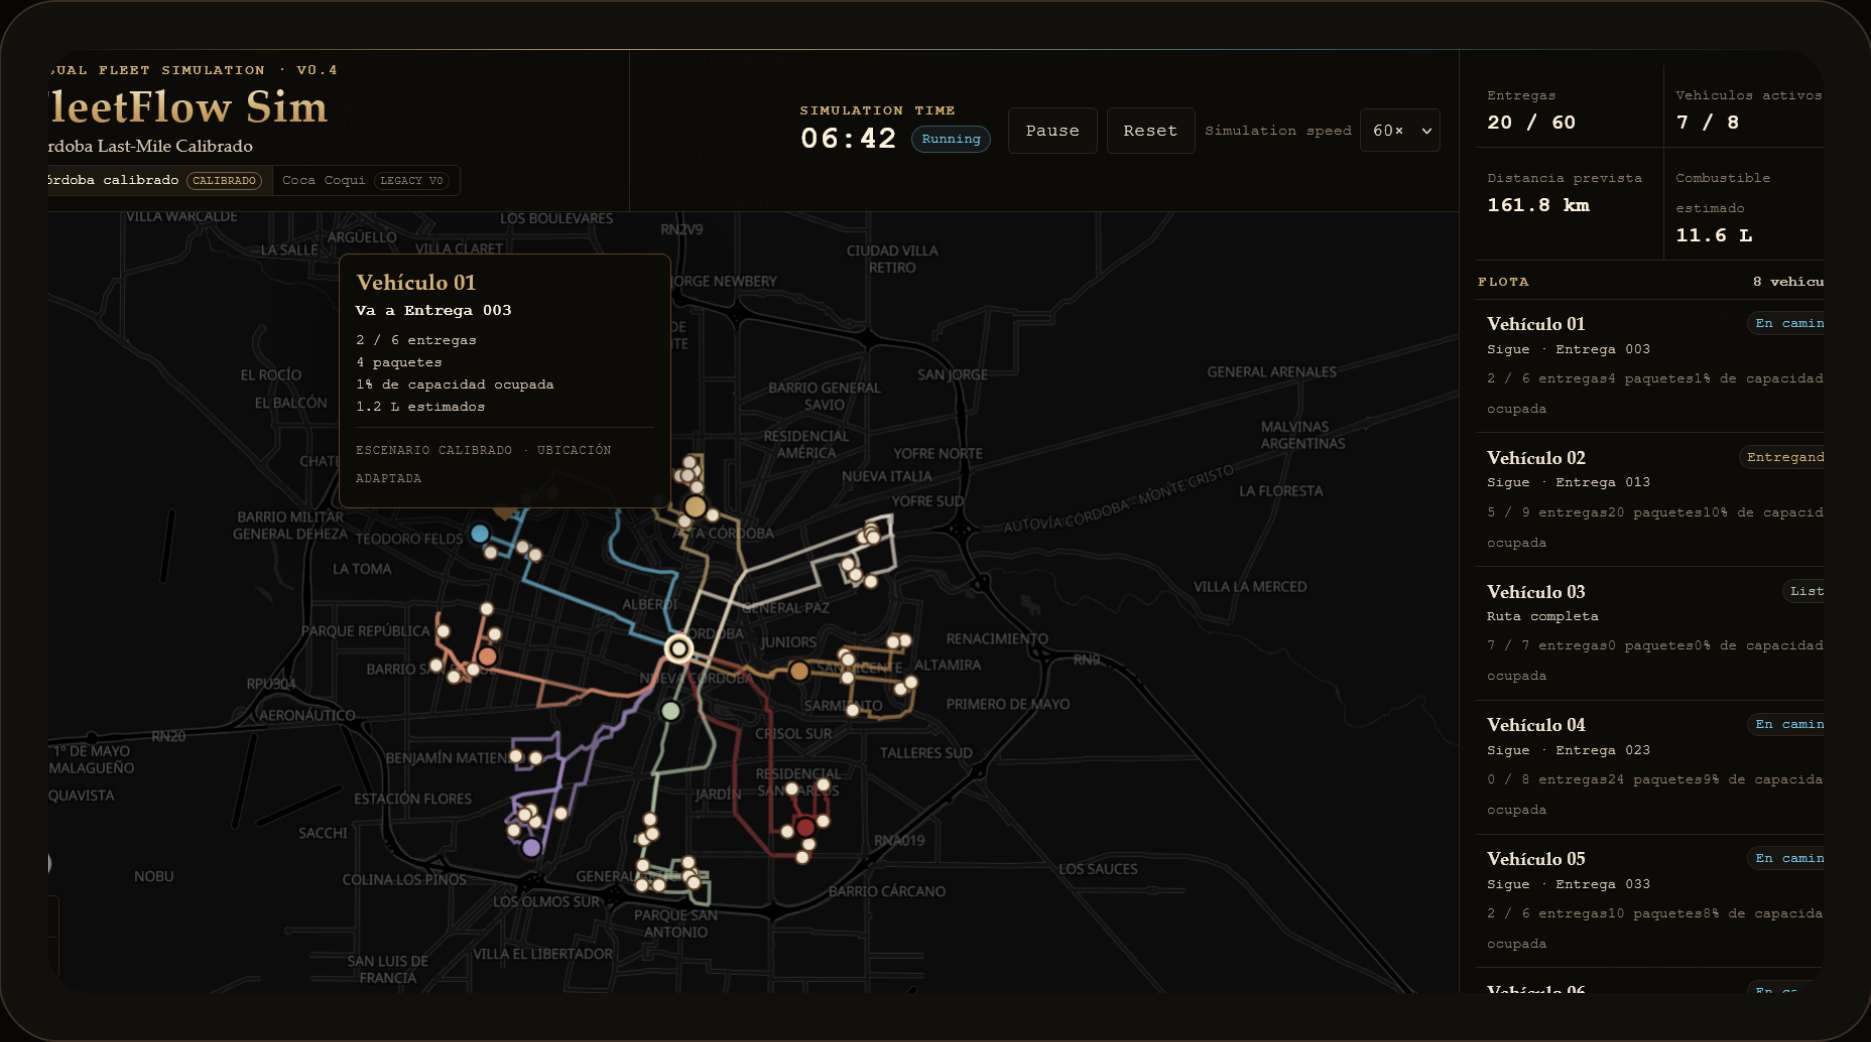

An evidence-first interface for territorial questions. Pick a case, see what is known, what is missing, what supports it and what question should come next.

STACK

- React
- Territorial Cases
- Evidence
- Local Persistence

SELECTED BUILD

FleetFlow Sim

STATUS

LIVE · OPEN SOURCE

A delivery fleet simulator set in Córdoba. Vehicles follow routes, stop at deliveries, carry packages and expose distance, fuel and fleet KPIs while the simulation runs.

STACK

- React
- TypeScript
- MapLibre
- Turf

- open app →
- repository →

Atlas Geotech

STATUS

LIVE APPLICATION · PUBLIC REPOSITORY

An interactive mining atlas for exploring Argentine projects by province, mineral, project stage, company and capital origin.

STACK

- R
- Shiny
- sf
- dplyr

- open app →
- repository →

Small tools, local systems and experiments

A second layer of builds focused on workflows, question structuring, media production and agent experiments.

Opportunity OS

A local-first job-search system for finding opportunities, tracking target companies, generating evidence-backed CVs and organizing outreach.

Python

FastAPI

SQLite

Gmail Adapter

repository →

Question Radar

A Python tool that turns questions into structured data and shows what assumptions, evidence or next questions are missing.

Python

SQLite

CLI

170 tests

repository →

Screen2Social

A local pipeline that turns OBS screen recordings into a ready-to-post video, thumbnail, metadata and optional local transcript.

Python

FFmpeg

OBS WebSocket

whisper.cpp

repository →

Geo Agent

A small geospatial agent experiment built around tools, external sources and validation instead of AI-only answers.

LangChain

LangGraph

Tool Calling
